❖ **Career Objectives:**

Seeking a challenging and growth-oriented role as a Software Developer, leveraging my 2+ years of hands-on experience in building scalable and efficient web applications. My goal is to contribute to innovative projects, continuously enhance my skills, and play a vital role in driving technical excellence within the organization.

❖ **Key Skills:**

- ✓ **Programming Languages:** Javascript, Node.js, Typescript, React.js
- ✓ **Frameworks:** Express.js, AWS Serverless, React Native
- ✓ **Architectures:** Monolithic and Microservices
- ✓ **Databases:** MongoDB, MySQL, Postgres, DynamoDB
- ✓ **Technologies:** Redis, Nodemailer, Mailgun, Twilio, Mongoose, Sequelize, Firebase, etc.

❖ **Work Experience:**

➤ **Agriapp Technologies** (*Nov 2023 – Present*)

Designation: *Software Developer (Software developer)*

- Developed and maintained the fintech application called [Agrifi](#) for both B2B and B2C, which is a BNPL (buy now pay later) model for our main app called Agriapp.
- Created Restful APIs for frontend integration and data retrieval/manipulation
- Successfully integrated the *Payopt* and *Rupifi* (third party services) APIs for loan disbursement and repayments.
- Implemented AWS services like S3 and Cloudwatch for file storage and logging.

➤ **Antino Labs** (*June 2022 – Oct 2023*)

Designation: *Associate Software Developer*

- Developed and maintained server-side applications using Node.js, ensuring scalability, performance, and security.
- Designed and developed various restful APIs for data retrieval and manipulation.
- Worked with various databases, including MySQL, PostgreSQL, MongoDB, and DynamoDB, to store and retrieve data efficiently
- Researched and integrated different third party apis including Razorpay, Linkedin, Notion, Google, Sertifier, etc.
- Optimized application performance by identifying and resolving bottleneck issues.
- Troubleshoot and debug server-side issues and implement effective solutions.

➤ **Technosters** (Feb 2022 – May 2022)

Designation: *Full-stack Intern*

- Worked on multiple projects for both frontend as well as backend.
- Developed responsive websites using React, HTML, and CSS with optimizations.
- Worked on existing/ongoing projects for bug fixing and implementing new features.
- Learned and implemented new libraries and strategies for better end results.
- Deal with clients regarding their requirements and issues for their application.

➤ **Marvel Trip** (May 2020 – June 2020)

Designation: *Front-end Developer and Tester trainee*

- Developed and maintained the company's business website.
- Manually tested the website functionalities and filters, and prepared respective reports.

❖ **Projects :**

→ [Agrifi:](#)

Agrifi is a fintech application that provides the credit limit to the farmers and businesses, which is basically a BNPL model, means Buy Now Pay Later through which user can purchase the [Agriapp products](#) on credit basis

- Developed two different backend applications, one is for B2B and second is for B2C customers
- Developed two microservices for each application, one for user KYC and onboarding and other for user payments and dashboard
- Integrated third party credit providers *Payopt and Rupifi* for application approval and limit allocation
- Monitored the AWS logs to identify the breakpoints in the application
- Integrated AWS S3 service for file storage and KYC documents.

→ [Almabetter:](#)

Almabetter is an online technical education platform that offers various courses to the students along with the certificate, placement guarantee and university degree.

- Created lambda functions, set up cron jobs, added lambda logs, etc in the serverless architecture
- Designed and developed multiple flows including referral system, points feature on completing various activities, cohort leaderboard, etc.
- Worked on third party integrations like Google apis, Linkedin apis, notion, Sertifier to generate user certificates, Brillium, etc.
- Monitored the AWS logs and Sentry issues to identify the breakpoints in the application
- Created pages for student-leaderboard and referral details using react
- Resolved and hot-fixed the high priority production issues for their live website

→ [Travel Hangouts:](#)

Travel hangouts is a travel agency website which offers users to explore and book their vacation among a variety of travel packages with over 20+ destinations including both domestic and international.

- Implemented user and admin authentication using signup with google feature.
- Created the CRUD apis for the Landing page, User, Stories, Themes, Facilities, FAQs and contact us modules.
- Implemented the mail service (nodemailer) to send the enquiry emails to the users
- Created complex aggregations to fetch data for large APIs
- Designed and developed the Admin panel for the website using React
- Developed the APIs for the Admin panel to manage user-site content regarding blogs, stories, new tour-packages, etc. and to handle user enquiries

→ [Services4Home:](#)

Services4Home is a platform similar to UrbanClap, providing users with the convenience of booking a wide range of home services, including AC servicing, electrical assistance, and more.

- Developed APIs for the user, service and admin modules.
- Implemented the S3 bucket functionality to upload images for the app.
- Implemented the attendance and availability feature for the service providers.
- Fixed the API bugs and refactored existing APIs for both the user and admin module.

❖ **Education Summary :**

- B.Tech, Computer Science Engineering- Echelon Institute of Technology, Faridabad (*Passed in 2022, CGPA: 8.83*)
